

dbConcert

dbConcert is a Technology Solutions Provider with a strong focus in the Financial Services Industry. We offer a wide variety of services that are designed to assist our clients in meeting their technology challenges. By bringing a combination of strong business and technical expertise we are able to add significant value to each of our engagements.

In addition to broad knowledge of the entire financial services industry, we have specific expertise with the following types of systems:

- Trading Systems, Order Management and Order Routing
- Middle and Back Office Technology
- Business Process Management
- Customer Relationship Management
- Document and Content Management
- Data Warehousing and Business Intelligence
